# REPORT NO. FT 110

## EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

**A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.**

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

**B. Decrease in Coverage in Detailed Import Statistics.**

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

**C. Reasons for Changes and Explanation as to Methods Adopted.**

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

**D. The Estimating Procedure.**

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

**E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.**

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

| COMMODITY DESCRIPTION AND UNIT OF QUANTITY<br>SCHEDULE A NUMBER | | |
|---|---|---|
| COUNTRY OF ORIGIN | NET QUANTITY | VALUE (DOLLARS) |
| MEAT PRODUCTS | | |
| TOTAL | | 12,836,891 |
| SAMPLE 41** | | 67,020 |
| OVER 250 | | 12,769,871 |
| OVER 250 DATA SHOWN BELOW | | |
| BEEF BONE IN FRESH CHLD FROZN | | LB |
| 0018300 | 694,308 | 198,924 |
| CANADA | 241,977 | 69,781 |
| DOM REP | 359,773 | 104,327 |
| AUSTRAL | 87,655 | 22,247 |
| OTH CTY | 4,903 | 2,569 |

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

Additional guidance in connection with undercounting in the commodity by country statistics may be found, in some cases, in the supplementary data at the end of this report showing the distribution by country of the estimate for imports valued $250 or less. This supplementary country data is more fully described in paragraph H, below.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

**F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.**

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

| If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is | Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between | |
|---|---|---|
| | The specified estimate reduced by[1] | And the specified estimated increased by |
| 0 | 0 | [2]$2,200 |
| 1 | $1,600 | 4,400 |
| 2 | 2,500 | 5,100 |
| 3 | 3,200 | 5,600 |
| 4 | 3,700 | 6,100 |
| 5 | 4,200 | 6,500 |
| 6 | 4,600 | 6,900 |
| 7 or 8 | 5,400 | 7,600 |
| 9 or 10 | 6,000 | 8,100 |
| 11 - 14 | 6,800 | 3,800 |
| 15 - 19 | 7,600 | 9,600 |
| 20 - 29 | 9,100 | 10,900 |
| 30 - 39 | 10,800 | 12,600 |
| 40 - 49 | 12,400 | 14,200 |
| 50 - 64 | 14,200 | 16,000 |
| 65 - 79 | 16,000 | 17,800 |
| 80 - 99 | 17,900 | 19,700 |
| 100 - 124 | 20,300 | 22,100 |
| 125 - 149 | 22,500 | 24,200 |
| 150 - 174 | 24,700 | 25,800 |
| 175 - 199 | 26,200 | 28,000 |
| 200 - 249 | 29,000 | 30,800 |
| 250 - 299 | 32,000 | 33,800 |
| 300 - 399 | 37,000 | 39,000 |
| 400 - 499[3] | 41,900 | 43,600 |

[1]The limits shown in this column will of course be too large if they exceed 1/20 of the estimate of the low valued imports.

[2]Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3]If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

**G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

**H. Supplemental Data on the Distribution of Shipments Valued at $250 or Less by Country.**

Supplementary data on the estimated values for shipments valued at $250 or less by country are presented at the end of this report under arbitrary Schedule A commodity numbers 9999 300 for free imports and 9999 400 for dutiable imports. These data represent a recapitulation of the estimated values included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. No distinction is made between country of origin and country of shipment (used in the statistics on shipments valued over $250 when the country of origin is unknown) in the data presented under these arbitrary commodity numbers. Information on the number of sampled transactions, by commodity and by commodity by country is shown for use in determining the degree of reliability of the estimated values in accordance with the example given in the section on "The Accuracy of the Sample Estimates."

The absence of a country name in this recapitulation indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for that country and does not necessarily mean that no low-value imports were made.

# GENERAL EXPLANATION

## COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

## RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

| Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity |
|---|---|---|---|---|---|---|---|
| AOZ | Advoirdupois Ounce | DPC | Dozen Pieces | LF | Leaf | PK | Pack |
| BBL | Barrel | DPR | Dozen Pair | LFT | Linear Foot | PR | Pair |
| BFT. | Board Foot | FT | Foot | LTN | Long Ton | RM | Ream |
| BU | Bushel | GAL | Gallon | M | Thousand | RSQ | Roof Square |
| BUN | Bunch | GBX | Gross Boxes | MBF | Thousand Board Feet | SFT | Square Foot |
| CAR | Carat | GLB | Pound (gross weight) | MCF | Thousand Cubic Feet | SQI | Square Inch |
| CD | Cord | GR | Gross | MFT | Thousand Feet | STN | Short Ton |
| CFT | Cubic Foot | GRL | Gross Lines | MG | Milligram | SUF | Superficial Foot |
| CLB | Pound (net content) | GTN | Ton (gross weight) | NO | Number | SYD | Square Yard |
| CRT | Crate | IN | Inch | PC | Piece | TOZ | Troy Ounce |
| CTN | Ton (net content) | LB | Pound | PFG | Proof Gallon | WSQ | Wall Square |
| DOZ | Dozen | | | | | YD | Yard |

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JANUARY 1954

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

" "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/ See Footnote on page 45.

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

3/ Classifications combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

""Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 1 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/ Country of Shipment - (Country of Origin Unknown)

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**JANUARY 1954**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page [illegible] for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000

ESTIMATED VALUES FOR UNITED STATES IMPORTS FOR CONSUMPTION IN SHIPMENTS VALUED AT $250 OR LESS, BY COUNTRY
JANUARY 1954

(The data shown below represent a recapitulation of the estimated values for shipments valued at $250 or less included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. The estimated amounts are shown in this supplement under arbitrary Schedule A commodity number 9999 300 for free imports and number 9999 400 for dutiable imports. The number of shipments in the sample upon which the estimated amounts are based are shown immediately following the Schedule A commodity numbers and the countries. For an explanation of the sampling procedure and use of number of shipments in sample to determine the reliability of the sample, see page 4 .)

# REPORT NO. FT 110

## EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

**A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.**

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

**B. Decrease in Coverage in Detailed Import Statistics.**

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

**C. Reasons for Changes and Explanation as to Methods Adopted.**

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

**D. The Estimating Procedure.**

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

**E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.**

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

| COMMODITY DESCRIPTION AND UNIT OF QUANTITY<br>SCHEDULE A NUMBER | | |
|---|---|---|
| COUNTRY OF ORIGIN | NET QUANTITY | VALUE (DOLLARS) |
| MEAT PRODUCTS | | |
| TOTAL | | 12,836,891 |
| SAMPLE 41** | | 67,020 |
| OVER 250 | | 12,769,871 |
| OVER 250 DATA SHOWN BELOW | | |
| BEEF BONE IN FRESH CHLD FROZN | | LB |
| 0018300 | 694,308 | 198,924 |
| CANADA | 241,977 | 69,781 |
| DOM REP | 359,773 | 104,327 |
| AUSTRAL | 87,655 | 22,247 |
| OTH CTY | 4,903 | 2,569 |

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

Additional guidance in connection with undercounting in the commodity by country statistics may be found, in some cases, in the supplementary data at the end of this report showing the distribution by country of the estimate for imports valued $250 or less. This supplementary country data is more fully described in paragraph H, below.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

### F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

| If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is | Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between | |
|---|---|---|
| | The specified estimate reduced by[1] | And the specified estimated increased by |
| 0 | 0 | [2]$2,200 |

| 300 - 399 | 37,000 | 39,000 |
| 400 - 499[3] | 41,900 | 43,600 |

[1]The limits shown in this column will of course be too large if they exceed 1/20 of the estimate of the low valued imports.

[2]Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3]If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

**G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

**H. Supplemental Data on the Distribution of Shipments Valued at $250 or Less by Country.**

Supplementary data on the estimated values for shipments valued at $250 or less by country are presented at the end of this report under arbitrary Schedule A commodity numbers 9999 300 for free imports and 9999 400 for dutiable imports. These data represent a recapitulation of the estimated values included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. No distinction is made between country of origin and country of shipment (used in the statistics on shipments valued over $250 when the country of origin is unknown) in the data presented under these arbitrary commodity numbers. Information on the number of sampled transactions, by commodity and by commodity by country is shown for use in determining the degree of reliability of the estimated values in accordance with the example given in the section on "The Accuracy of the Sample Estimates."

The absence of a country name in this recapitulation indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for that country and does not necessarily mean that no low-value imports were made.

# GENERAL EXPLANATION

## COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

## RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

| Description | Schedule A Commodity Code No. | Page No. |
|---|---|---|
| GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE | | |
| Animals, edible (except for breeding) | 0010600-0015500 | 8 |
| Meat products | 0018300-0035500 | 8 |
| Animal oils and fats, edible | 0036000-0036900 | 8 |
| Dairy products | 0037000-0046990 | 8 |
| Fish and fish products, except shellfish | 0047000-0079590 | 8 |
| Shellfish and products | 0080100-0087900 | 9 |
| Other edible animal products | 0088100-0097900 | 9 |
| GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE | | |
| Hides and skins, raw (except furs) | 0201000-0299900 | 10 |
| Leather | 0300100-0345900 | 10 |
| Leather, rawhide, and parchment manufactures | 0350300-0699990 | 11 |
| Furs and manufactures | 0701000-0759900 | 11 |
| Animal and fish oils, fats, and greases, inedible | 0803000-0821600 | 12 |
| Other inedible animals and animal products | 0840000-0990290 | 12 |
| GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES | | |
| Grains and preparations | 1020000-1090260 | 13 |
| Fodders and feeds, n.e.s. | 1101000-1190800 | 13 |
| Vegetables and preparations | 1191100-1250990 | 13 |
| Fruits and preparations | 1290000-1330990 | 14 |
| Nuts and preparations | 1350000-1380140 | 14 |
| Vegetable oils and fats, edible | 1420000-1428900 | 14 |
| Cocoa, coffee, and tea | 1501300-1521000 | 14 |
| Spices | 1523100-1550590 | 15 |
| Sugar and related products | 1570000-1654800 | 15 |
| Beverages | 1711300-1900000 | 15 |
| GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD | | |
| Rubber and allied gums and manufactures | 2011000-2098900 | 16 |
| Gums, resins, and balsams, n.e.s. | 2102000-2189400 | 16 |
| Drugs, herbs, leaves, roots, etc. | 2201000-2220490 | 16 |
| Oil seeds | 2231000-2240700 | 17 |
| Vegetable oils and vegetable waxes | 2241000-2290590 | 17 |
| Dyeing and tanning materials | 2302000-2345950 | 17 |
| Seeds, except oil seeds | 2401000-2460990 | 17 |
| Nursery and greenhouse stock | 2501000-2599100 | 18 |
| Tobacco and manufactures | 2601000-2629900 | 18 |
| Miscellaneous vegetable products | 2800000-2960150 | 18 |
| GROUP 3 - TEXTILE FIBERS AND MANUFACTURES | | |
| Cotton unmanufactured | 3001010-3005000 | 18 |
| Cotton semimanufactures | 3006150-3020999 | 18 |
| Cotton manufactures | 3030000-3230800 | 18 |
| Jute and manufactures | 3241000-3250900 | 19 |
| Flax, hemp, and ramie, and manufactures | 3261000-3390590 | 20 |
| Other vegetable fibers and manufactures | 3401000-3421990 | 20 |
| Wool, unmanufactured | 3501000-3541000 | 21 |
| Wool semimanufactures | 3550000-3574600 | 22 |
| Wool manufactures | 3607000-3680800 | 22 |
| Hair and manufactures, n.e.s. | 3690000-3698900 | 23 |
| Silk, unmanufactured | 3702000-3704200 | 23 |
| Silk manufactures | 3705100-3799900 | 23 |
| Manufactures of rayon or other Man-made (synthetic) textile | 3800000-3880490 | 24 |
| Miscellaneous textile products | 3900100-3981100 | 24 |
| GROUP 4 - WOOD AND PAPER | | |
| Wood, unmanufactured | 4007100-4080500 | 25 |
| Sawmill products (lumber) | 4103100-4207555 | 25 |
| Wood manufactures | 4208000-4280990 | 25 |
| Cork and manufactures | 4300000-4321900 | 26 |
| Paper base stocks | 4590000-4692900 | 26 |
| Paper and manufactures | 4711000-4799990 | 26 |
| GROUP 5 - NONMETALLIC MINERALS | | |
| Coal and related fuels | 5001000-5014300 | 27 |
| Petroleum and products | 5052100-5079100 | 27 |
| Stone, lime, cement, gypsum, and gypsum products | 5080250-5193900 | 27 |
| Glass and glass products | 5200400-5290900 | 27 |
| Clay and clay products | 5300000-5390700 | 28 |
| Other nonmetallic minerals and manufactures (except precious stones and imitations) | 5391000-5930980 | 29 |
| Precious and semiprecious stones and imitations and industrial diamonds | 5950000-5958200 | 29 |
| GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES | | |
| Iron ore and concentrates | 6001000-6001100 | 30 |
| Iron and steel semimanufactures | 6002000-6060300 | 30 |
| Steel mill products—manufactures | 6081020-6116100 | 30 |
| Iron and steel advanced manufactures | 6117000-6200990 | 31 |
| Ferro-alloys, ores, and metals, n.e.s. | 6211000-6270900 | 32 |
| Nonferrous metals, except precious | 6301000-6790990 | 33 |
| Precious metals, jewelry, and plated ware | 6820000-6900550 | 35 |
| GROUP 7 - MACHINERY AND VEHICLES | | |
| Electrical machinery and apparatus | 7063200-7100990 | 35 |
| Engines, turbines, and parts, n.e.s. | 7110000-7110700 | 35 |

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

| Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity |
|---|---|---|---|---|---|---|---|
| AOZ | Advoirdupois Ounce | DPC | Dozen Pieces | LF | Leaf | PK | Pack |
| BBL | Barrel | DPR | Dozen Pair | LFT | Linear Foot | PR | Pair |
| BFT | Board Foot | FT | Foot | LTN | Long Ton | RM | Ream |
| BU | Bushel | GAL | Gallon | M | Thousand | RSQ | Roof Square |

"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Imoort data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/Country of Shipment - (Country of Origin Unknown)

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Impor. data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**FEBRUARY 1954**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity d commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

g/See footnote on page 43.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

***Imports from each country are less than $10,000.*** **Oth Cty - includes countries from which imports are less than $10,000.**

5/Classifications combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1955 issue of FTSN.)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/Country of Shipment - (Country of Origin Unknown)

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/Country of Shipment - (Country of Origin Unknown)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

ESTIMATED VALUES FOR UNITED STATES IMPORTS FOR CONSUMPTION IN SHIPMENTS VALUED AT $250 OR LESS, BY COUNTRY

**FEBRUARY 1954**

(The data shown below represent a recapitulation of the estimated values for shipments valued at $250 or less included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. The estimated amounts are shown in this supplement under arbitrary Schedule A commodity number 9999 300 for free imports and number 9999 400 for dutiable imports. The number of shipments in the sample upon which the estimated amounts are based are shown immediately following the Schedule A commodity numbers and the countries. For an explanation of the sampling procedure and use of number of shipments in the sample to determine the reliability of the sample, see page 4 .)

# REPORT NO. FT 110

## EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

**A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.**

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

**B. Decrease in Coverage in Detailed Import Statistics.**

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

**C. Reasons for Changes and Explanation as to Methods Adopted.**

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

**D. The Estimating Procedure.**

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

**E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.**

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

| COUNTRY OF ORIGIN | NET QUANTITY | VALUE (DOLLARS) |
|---|---|---|
| MEAT PRODUCTS | | |
| TOTAL | | 12,836,891 |
| SAMPLE 41** | | 67,020 |
| OVER 250 | | 12,769,871 |
| OVER 250 DATA SHOWN BELOW | | |
| BEEF BONE IN FRESH CHLD FROZN | | LB |
| 0018300 | 694,308 | 198,924 |
| CANADA | 241,977 | 69,781 |
| DOM REP | 359,773 | 104,327 |
| AUSTRAL | 87,655 | 22,247 |
| OTH CTY | 4,803 | 2,569 |

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

Additional guidance in connection with undercounting in the commodity by country statistics may be found, in some cases, in the supplementary data at the end of this report showing the distribution by country of the estimate for imports valued $250 or less. This supplementary country data is more fully described in paragraph H, below.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

### F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

| If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is | Then the chances are better than 2 out of 3 that a complete tabulation should have resulted in a value figure between | |
|---|---|---|
| | The specified estimate reduced by[1] | And the specified estimated increased by |
| 0 | 0 | [2]$2,200 |
| 1 | $1,600 | 4,400 |
| 2 | 2,500 | 5,100 |
| 3 | 3,200 | 5,600 |
| 4 | 3,700 | 6,100 |
| 5 | 4,200 | 6,500 |
| 6 | 4,600 | 6,900 |
| 7 or 8 | 5,400 | 7,600 |
| 9 or 10 | 6,000 | 8,100 |
| 11 - 14 | 6,800 | 8,800 |
| 15 - 19 | 7,600 | 9,600 |
| 20 - 29 | 9,100 | 10,900 |
| 30 - 39 | 10,800 | 12,600 |
| 40 - 49 | 12,400 | 14,200 |
| 50 - 64 | 14,200 | 16,000 |
| 65 - 79 | 16,000 | 17,800 |
| 80 - 99 | 17,900 | 19,700 |
| 100 - 124 | 20,300 | 22,100 |
| 125 - 149 | 22,500 | 24,200 |
| 150 - 174 | 24,700 | 25,800 |
| 175 - 199 | 26,200 | 28,000 |
| 200 - 249 | 29,000 | 30,800 |
| 250 - 299 | 32,000 | 33,800 |
| 300 - 399 | 37,000 | 39,000 |
| 400 - 499[3] | 41,900 | 43,600 |

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined

total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

**G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

**H. Supplemental Data on the Distribution of Shipments Valued at $250 or Less by Country.**

Supplementary data on the estimated values for shipments valued at $250 or less by country are presented at the end of this report under arbitrary Schedule A commodity numbers 9999 300 for free imports and 9999 400 for dutiable imports. These data represent a recapitulation of the estimated values included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. No distinction is made between country of origin and country of shipment (used in the statistics on shipments valued over $250 when the country of origin is unknown) in the data presented under these arbitrary commodity numbers. Information on the number of sampled transactions, by commodity and by commodity by country is shown for use in determining the degree of reliability of the estimated values in accordance with the example given in the section on "The Accuracy of the Sample Estimates."

The absence of a country name in this recapitulation indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for that country and does not necessarily mean that no low-value imports were made.

# GENERAL EXPLANATION

## COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

## RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

| Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity |
|---|---|---|---|---|---|---|---|
| AOZ | Advoirdupois Ounce | DPC | Dozen Pieces | LF | Leaf | PK | Pack |
| BBL | Barrel | DPR | Dozen Pair | LFT | Linear Foot | PR | Pair |
| BFT | Board Foot | FT | Foot | LTN | Long Ton | RM | Ream |
| BU | Bushel | GAL | Gallon | M | Thousand | RSQ | Roof Square |
| BUN | Bunch | GBX | Gross Boxes | MBF | Thousand Board Feet | SFT | Square Foot |
| CAR | Carat | GLB | Pound (gross weight) | MCF | Thousand Cubic Feet | SQI | Square Inch |
| CD | Cord | GR | Gross | MFT | Thousand Feet | STN | Short Ton |
| CFT | Cubic Foot | GRL | Gross Lines | MG | Milligram | SUF | Superficial Foot |
| CLB | Pound (net content) | GTN | Ton (gross weight) | NO | Number | SYD | Square Yard |
| CRT | Crate | IN | Inch | PC | Piece | TOZ | Troy Ounce |
| CTN | Ton (net content) | LB | Pound | PFG | Proof Gallon | WSQ | Wall Square |
| DOZ | Dozen | | | | | YD | Yard |

**Import data on lines labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 of the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty – includes countries from which imports are less than $10,000.

a/ Classifications combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

1/Country of Shipment - (Country of Origin Unknown)

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty – Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**MARCH 1954**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. (Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty – Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 6 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

ESTIMATED VALUES FOR UNITED STATES IMPORTS FOR CONSUMPTION IN SHIPMENTS VALUED AT $250 OR LESS, BY COUNTRY

**MARCH 1954**

(The data shown below represent a recapitulation of the estimated values for shipments valued at $250 or less included in the commodity subgroup, commodity group and over-all totals shown in Report FT 110 and should not be added to any of these totals. The estimated amounts are shown in this supplement under arbitrary Schedule A commodity number 9999 300 for free imports and number 9999 400 for dutiable imports. The number of shipments in the sample upon which the estimated amounts are based are shown immediately following the Schedule A commodity numbers and the countries. For an explanation of the sampling procedure and use of number of shipments in sample to determine the reliability of the sample, see page 4 .)

# REPORT NO. FT 110

## EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

**A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.**

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

**B. Decrease in Coverage in Detailed Import Statistics.**

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

**C. Reasons for Changes and Explanation as to Methods Adopted.**

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

**D. The Estimating Procedure.**

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

**E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.**

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

| COMMODITY DESCRIPTION AND UNIT OF QUANTITY<br>SCHEDULE A NUMBER | | |
|---|---|---|
| COUNTRY OF ORIGIN | NET QUANTITY | VALUE (DOLLARS) |
| MEAT PRODUCTS | | |
| TOTAL | | 12,836,891 |
| SAMPLE 41** | | 67,020 |
| OVER 250 | | 12,769,871 |
| OVER 250 DATA SHOWN BELOW | | |
| BEEF BONE IN FRESH CHLD FROZN | | LB |
| 0018300 | 694,308 | 198,924 |
| CANADA | 241,977 | 69,781 |
| DOM REP | 359,773 | 104,327 |
| AUSTRAL | 87,655 | 22,247 |
| OTH CTY | 4,903 | 2,569 |

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

Additional guidance in connection with undercounting in the commodity by country statistics may be found, in some cases, in the supplementary data at the end of this report showing the distribution by country of the estimate for imports valued $250 or less. This supplementary country data is more fully described in paragraph H, below.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

## F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

| If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is | Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between | |
|---|---|---|
| | The specified estimate reduced by[1] | And the specified estimated increased by |

| 9 or 10 | 6,000 | 8,100 |
| 11 - 14 | 6,800 | 3,800 |
| 15 - 19 | 7,600 | 9,600 |
| 20 - 29 | 9,100 | 10,900 |
| 30 - 39 | 10,800 | 12,600 |
| 40 - 49 | 12,400 | 14,200 |
| 50 - 64 | 14,200 | 16,000 |
| 65 - 79 | 16,000 | 17,800 |
| 80 - 99 | 17,900 | 19,700 |
| 100 - 124 | 20,300 | 22,100 |
| 125 - 149 | 22,500 | 24,200 |
| 150 - 174 | 24,700 | 25,800 |
| 175 - 199 | 26,200 | 28,000 |
| 200 - 249 | 29,000 | 30,800 |
| 250 - 299 | 32,000 | 33,800 |
| 300 - 399 | 37,000 | 39,000 |
| 400 - 499[3] | 41,900 | 43,600 |

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined

total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

**G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

# GENERAL EXPLANATION

## COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

## RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

| Description | Schedule A Commodity Code No. | Page No. |
|---|---|---|
| GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE | | |
| Animals, edible (except for breeding) | 0010600-0015500 | 8 |
| Meat products | 0018300-0035500 | 8 |
| Animal oils and fats, edible | 0036000-0036900 | 8 |
| Dairy products | 0037000-0046990 | 8 |
| Fish and fish products, except shellfish | 0047000-0079590 | 8 |
| Shellfish and products | 0080100-0087900 | 9 |
| Other edible animal products | 0088100-0097900 | 9 |
| GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE | | |
| Hides and skins, raw (except furs) | 0201000-0299900 | 10 |
| Leather | 0300100-0345900 | 10 |
| Leather, rawhide, and parchment manufactures | 0350300-0699990 | 11 |
| Furs and manufactures | 0701000-0759900 | 11 |
| Animal and fish oils, fats, and greases, inedible | 0803000-0821600 | 12 |
| Other inedible animals and animal products | 0840000-0990290 | 12 |
| GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES | | |
| Grains and preparations | 1020000-1090260 | 13 |
| Fodders and feeds, n.e.s. | 1101000-1190800 | 13 |
| Vegetables and preparations | 1191100-1250990 | 13 |
| Fruits and preparations | 1290000-1330990 | 14 |
| Nuts and preparations | 1350000-1380140 | 14 |
| Vegetable oils and fats, edible | 1420000-1428900 | 14 |
| Cocoa, coffee, and tea | 1501300-1521000 | 15 |
| Spices | 1523100-1550590 | 15 |
| Sugar and related products | 1570000-1654800 | 15 |
| Beverages | 1711300-1900000 | 16 |
| GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD | | |
| Rubber and allied gums and manufactures | 2011000-2098900 | 16 |
| Gums, resins, and balsams, n.e.s. | 2102000-2189400 | 17 |
| Drugs, herbs, leaves, roots, etc. | 2201000-2220490 | 17 |
| Oil seeds | 2231000-2240700 | 17 |
| Vegetable oils and vegetable waxes | 2241000-2290590 | 17 |
| Dyeing and tanning materials | 2302000-2345950 | 18 |
| Seeds, except oil seeds | 2401000-2460990 | 18 |
| Nursery and greenhouse stock | 2501000-2599100 | 18 |
| Tobacco and manufactures | 2601000-2629900 | 18 |
| Miscellaneous vegetable products | 2800000-2960150 | 19 |
| GROUP 3 - TEXTILE FIBERS AND MANUFACTURES | | |
| Cotton unmanufactured | 3001010-3005000 | 19 |
| Cotton semimanufactures | 3006150-3020999 | 19 |
| Cotton manufactures | 3030000-3230800 | 19 |
| Jute and manufactures | 3241000-3250900 | 20 |
| Flax, hemp, and ramie, and manufactures | 3261000-3390590 | 21 |
| Other vegetable fibers and manufactures | 3401000-3421990 | 21 |
| Wool, unmanufactured | 3501000-3541000 | 21 |
| Wool semimanufactures | 3550000-3574600 | 23 |
| Wool manufactures | 3607000-3680800 | 23 |
| Hair and manufactures, n.e.s. | 3690000-3698900 | 24 |
| Silk, unmanufactured | 3702000-3704200 | 24 |
| Silk manufactures | 3705100-3799900 | 24 |
| Manufactures of rayon or other Man-made (synthetic) textile | 3800000-3880490 | 25 |
| Miscellaneous textile products | 3900100-3981100 | 25 |
| GROUP 4 - WOOD AND PAPER | | |
| Wood, unmanufactured | 4007100-4080500 | 26 |
| Sawmill products (lumber) | 4103100-4207555 | 26 |
| Wood manufactures | 4208000-4280990 | 26 |
| Cork and manufactures | 4300000-4321900 | 27 |
| Paper base stocks | 4590000-4692900 | 27 |
| Paper and manufactures | 4711000-4799990 | 28 |
| GROUP 5 - NONMETALLIC MINERALS | | |
| Coal and related fuels | 5001000-5014300 | 29 |
| Petroleum and products | 5052100-5079100 | 29 |
| Stone, lime, cement, gypsum, and gypsum products | 5080250-5193900 | 29 |
| Glass and glass products | 5200400-5290900 | 29 |
| Clay and clay products | 5300000-5390700 | 30 |
| Other nonmetallic minerals and manufactures (except precious stones and imitations) | 5391000-5930980 | 31 |
| Precious and semiprecious stones and imitations and industrial diamonds | 5950000-5958200 | 31 |
| GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES | | |
| Iron ore and concentrates | 6001000-6001100 | 32 |
| Iron and steel semimanufactures | 6002000-6060300 | 32 |
| Steel mill products—manufactures | 6081020-6116100 | 32 |
| Iron and steel advanced manufactures | 6117000-6200990 | 33 |
| Ferro-alloys, ores, and metals, n.e.s. | 6211000-6270900 | 34 |
| Nonferrous metals, except precious | 6301000-6790990 | 35 |
| Precious metals, jewelry, and plated ware | 6820000-6900550 | 37 |

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

| Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity |
|---|---|---|---|---|---|---|---|
| AOZ | Advoirdupois Ounce | DPC | Dozen Pieces | LF | Leaf | PK | Pack |
| BBL | Barrel | DPR | Dozen Pair | LFT | Linear Foot | PR | Pair |
| BFT | Board Foot | FT | Foot | LTN | Long Ton | RM | Ream |
| BU | Bushel | GAL | Gallon | M | Thousand | RSQ | Roof Square |

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**APRIL 1954**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double astorisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

***Imports from each country are less than $10,000.*** Oth Cty - **includes countries from which imports are less than $10,000.**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

***Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.**

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

2/Classifications combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

1/ Country of Shipment - (Country of Origin Unknown)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

**A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.**

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

**B. Decrease in Coverage in Detailed Import Statistics.**

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

**C. Reasons for Changes and Explanation as to Methods Adopted.**

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

**D. The Estimating Procedure.**

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

**E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.**

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less is on a subgroup basis, the amount estimated for each subgroup is the best available indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

| COMMODITY DESCRIPTION AND UNIT OF QUANTITY<br>SCHEDULE A NUMBER | | |
|---|---|---|
| COUNTRY OF ORIGIN | NET QUANTITY | VALUE (DOLLARS) |
| MEAT PRODUCTS | | |
| TOTAL | | 12,836,891 |
| SAMPLE 41** | | 67,020 |
| OVER 250 | | 12,769,871 |
| OVER 250 DATA SHOWN BELOW | | |
| BEEF BONE IN FRESH CHLD FROZN | | LB |
| 0018300 | 694,308 | 198,924 |
| CANADA | 241,977 | 69,781 |
| DOM REP | 359,773 | 104,327 |
| AUSTRAL | 87,655 | 22,247 |
| OTH CTY | 4,903 | 2,569 |

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

Some indication of the undercounting on a 4-digit Schedule A commodity basis without regard to country is provided in the February 1954 *Notes*, in the form of data for a sample month. Users interested in additional information for particular commodities may make inquiry of the Bureau as to the information available.

Additional guidance in connection with undercounting in the commodity by country statistics may be found, in some cases, in the supplementary data at the end of this report showing the distribution by country of the estimate for imports valued $250 or less. This supplementary country data is more fully described in paragraph H, below.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

### F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

| If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is | Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between | |
|---|---|---|
| | The specified estimate reduced by[1] | And the specified estimated increased by |
| 0 | 0 | [2]$2,200 |
| 1 | $1,600 | 4,400 |
| 2 | 2,500 | 5,100 |
| 3 | 3,200 | 5,600 |
| 4 | 3,700 | 6,100 |
| 5 | 4,200 | 6,500 |
| 6 | 4,600 | 6,900 |
| 7 or 8 | 5,400 | 7,600 |
| 9 or 10 | 6,000 | 8,100 |
| 11 - 14 | 6,800 | 8,800 |
| 15 - 19 | 7,600 | 9,600 |
| 20 - 29 | 9,100 | 10,900 |
| 30 - 39 | 10,800 | 12,600 |
| 40 - 49 | 12,400 | 14,200 |
| 50 - 64 | 14,200 | 16,000 |
| 65 - 79 | 16,000 | 17,800 |
| 80 - 99 | 17,900 | 19,700 |
| 100 - 124 | 20,300 | 22,100 |
| 125 - 149 | 22,500 | 24,200 |
| 150 - 174 | 24,700 | 25,800 |
| 175 - 199 | 26,200 | 28,000 |
| 200 - 249 | 29,000 | 30,800 |
| 250 - 299 | 32,000 | 33,800 |
| 300 - 399 | 37,000 | 39,000 |
| 400 - 499[3] | 41,900 | 43,600 |

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined

total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

**G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

# GENERAL EXPLANATION

## COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

## RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

| Description | Schedule A Commodity Code No. | Page No. |
|---|---|---|
| GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE | | |
| Animals, edible (except for breeding) | 0010600-0015500 | 8 |
| Meat products | 0018300-0035500 | 8 |
| Animal oils and fats, edible | 0036000-0036900 | 8 |
| Dairy products | 0037000-0046990 | 8 |
| Fish and fish products, except shellfish | 0047000-0079590 | 8 |
| Shellfish and products | 0080100-0087900 | 9 |
| Other edible animal products | 0088100-0097900 | 9 |
| GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE | | |
| Hides and skins, raw (except furs) | 0201000-0299900 | 9 |
| Leather | 0300100-0345900 | 10 |
| Leather, rawhide, and parchment manufactures | 0350300-0699990 | 10 |
| Furs and manufactures | 0701000-0759900 | 11 |
| Animal and fish oils, fats, and greases, inedible | 0803000-0821600 | 11 |
| Other inedible animals and animal products | 0840000-0990290 | 12 |
| GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES | | |
| Grains and preparations | 1020000-1090260 | 13 |
| Fodders and feeds, n.e.s. | 1101000-1190800 | 13 |
| Vegetables and preparations | 1191100-1250990 | 13 |
| Fruits and preparations | 1290000-1330990 | 13 |
| Nuts and preparations | 1350000-1380140 | 14 |
| Vegetable oils and fats, edible | 1420000-1428900 | 14 |
| Cocoa, coffee, and tea | 1501300-1521000 | 14 |
| Spices | 1543100-1550590 | 15 |
| Sugar and related products | 1570000-1654800 | 15 |
| Beverages | 1711300-1900000 | 15 |
| GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD | | |
| Rubber and allied gums and manufactures | 2011000-2098900 | 16 |
| Gums, resins, and balsams, n.e.s. | 2102000-2189400 | 16 |
| Drugs, herbs, leaves, roots, etc. | 2201000-2220490 | 16 |
| Oil seeds | 2231000-2240700 | 17 |
| Vegetable oils and vegetable waxes | 2241000-2290590 | 17 |
| Dyeing and tanning materials | 2302000-2345950 | 17 |
| Seeds, except oil seeds | 2401000-2460990 | 17 |
| Nursery and greenhouse stock | 2501000-2599100 | 18 |
| Tobacco and manufactures | 2601000-2629900 | 18 |
| Miscellaneous vegetable products | 2800000-2960150 | 18 |
| GROUP 3 - TEXTILE FIBERS AND MANUFACTURES | | |
| Cotton unmanufactured | 3001010-3005000 | 18 |
| Cotton semimanufactures | 3006150-3020999 | 18 |
| Cotton manufactures | 3030000-3230800 | 18 |
| Jute and manufactures | 3241000-3250900 | 19 |
| Flax, hemp, and ramie, and manufactures | 3261000-3390590 | 20 |
| Other vegetable fibers and manufactures | 3401000-3421990 | 20 |
| Wool, unmanufactured | 3501000-3541000 | 21 |
| Wool semimanufactures | 3550000-3574600 | 22 |
| Wool manufactures | 3607000-3680800 | 22 |
| Hair and manufactures, n.e.s. | 3690000-3698900 | 23 |
| Silk, unmanufactured | 3702000-3704200 | 23 |
| Silk manufactures | 3705100-3799900 | 23 |
| Manufactures of rayon or other Man-made (synthetic) textile | 3800000-3880490 | 24 |
| Miscellaneous textile products | 3900100-3981100 | 24 |
| GROUP 4 - WOOD AND PAPER | | |
| Wood, unmanufactured | 4007100-4080500 | 25 |
| Sawmill products (lumber) | 4103100-4207555 | 25 |
| Wood manufactures | 4208000-4280990 | 25 |
| Cork and manufactures | 4300000-4321900 | 26 |
| Paper base stocks | 4590000-4692900 | 26 |
| Paper and manufactures | 4711000-4799990 | 26 |
| GROUP 5 - NONMETALLIC MINERALS | | |
| Coal and related fuels | 5001000-5014300 | 27 |
| Petroleum and products | 5052100-5079100 | 27 |
| Stone, lime, cement, gypsum, and gypsum products | 5080250-5193900 | 27 |
| Glass and glass products | 5200400-5290900 | 28 |
| Clay and clay products | 5300000-5390700 | 29 |
| Other nonmetallic minerals and manufactures (except precious stones and imitations) | 5391000-5930980 | 29 |
| Precious and semiprecious stones and imitations and industrial diamonds | 5950000-5958200 | 30 |
| GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES | | |
| Iron ore and concentrates | 6001000-6001100 | 30 |
| Iron and steel semimanufactures | 6002000-6060300 | 30 |
| Steel mill products—manufactures | 6081020-6116100 | 31 |
| Iron and steel advanced manufactures | 6117000-6200990 | 31 |
| Ferro-alloys, ores, and metals, n.e.s. | 6211000-6270900 | 32 |
| Nonferrous metals, except precious | 6301000-6790990 | 33 |
| Precious metals, jewelry, and plated ware | 6820000-6900550 | 35 |
| GROUP 7 - MACHINERY AND VEHICLES | | |
| Electrical machinery and apparatus | 7063200-7100990 | 36 |
| Engines, turbines, and parts, n.e.s. | 7110000-7110700 | 36 |
| Other machinery, except agricultural | 7400200-7800990 | 36 |
| Agricultural machinery and implements | 7850000-7890190 | 37 |
| Vehicles, except agricultural | 7900100-7940290 | 37 |
| GROUP 8 - CHEMICALS AND RELATED PRODUCTS | | |
| Coal-tar products | 8001000-8090900 | 38 |
| Medicinal and pharmaceutical preparations | 8102000-8150600 | 38 |
| Industrial chemicals | 8170040-8380982 | 38 |
| Pigments, paints, and varnishes | 8400100-8441300 | 39 |
| Fertilizers and fertilizer materials | 8500000-8559900 | 39 |
| Explosives, fireworks, and ammunition | 8620000-8695000 | 39 |
| Soap and toilet preparations | 8712300-8731200 | 39 |
| GROUP 9 - MISCELLANEOUS | | |
| Photographic goods | 9001000-9036600 | 40 |
| Scientific and professional instruments, apparatus, and supplies, n.e.s. | 9140200-9180290 | 40 |
| Musical instruments, parts, and accessories | 9200000-9280700 | 40 |
| Dolls and toys, athletic and sporting goods | 9400000-9439990 | 41 |
| Firearms | 9470000-9477000 | 41 |
| Books, maps, pictures, and other printed matter, n.e.s. | 9500000-9530890 | 41 |
| Clocks, watches, clockwork mechanisms, and parts | 9540100-9590099 | 42 |
| Art works and antiques | 9610000-9670300 | 42 |
| Miscellaneous articles, n.e.s. | 9700000-9990750 | 42 |
| REVISIONS | ..... | 44 |

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

| Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity | Abbrev. | Unit of Quantity |
|---|---|---|---|---|---|---|---|
| AOZ | Advoirdupois Ounce | DPC | Dozen Pieces | LF | Leaf | PK | Pack |
| BBL | Barrel | DPR | Dozen Pair | LFT | Linear Foot | PR | Pair |
| BFT | Board Foot | FT | Foot | LTN | Long Ton | RM | Ream |
| BU | Bushel | GAL | Gallon | M | Thousand | RSQ | Roof Square |
| BUN | Bunch | GBX | Gross Boxes | MBF | Thousand Board Feet | SFT | Square Foot |
| CAR | Carat | GLB | Pound (gross weight) | MCF | Thousand Cubic Feet | SQI | Square Inch |
| CD | Cord | GR | Gross | MFT | Thousand Feet | STN | Short Ton |
| CFT | Cubic Foot | GRL | Gross Lines | MG | Milligram | SUF | Superficial Foot |
| CLB | Pound (net content) | GTN | Ton (gross weight) | NO | Number | SYD | Square Yard |
| CRT | Crate | IN | Inch | PC | Piece | TOZ | Troy Ounce |
| CTN | Ton (net content) | LB | Pound | PFG | Proof Gallon | WSQ | Wall Square |
| DOZ | Dozen | | | | | YD | Yard |

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

"**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

***Imports from each country are less than $10,000.** Oth Cty - **includes countries from which imports are less than $10,000.**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

***Imports from each country are less than $10,000.** **Oth Cty - includes countries from which imports are less than $10,000.**

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty – includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty – includes countries from which imports are less than $10,000.

# UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**MAY 1954**
